

Uplinc Joins Forces with Industry Leading Network Providers

December 14th seminar announced at Uplinc

West Springfield, MA – December 5, 2006 Uplinc, Inc is pleased to announce a strategic partnership with Vantage Communications of Newtown, PA and Cisco Systems, Inc. of San Jose, CA. Vantage Communications specializes in providing IP Telephony solutions to small and medium business. Vantage's Cisco-powered VIP service integrates data and voice communications with the quality of service, security and productivity features that businesses are seeking.

By Partnering with Vantage, Uplinc is now able to offer a converged communications solution to our customers that integrate voice with their data system, which bundles the newest features in a managed solution.

Our clients gain access to the same technology that is being implemented by the largest global organizations, yet packaged in a solution that is right-sized for their business, requiring minimal staffing and up-front capital outlay.

“The VIP Service provides truly disruptive price points to small and medium businesses and branch offices combined with significant productivity gains,” said Ron Marino, President of Uplinc.

Uplinc will be providing a free seminar that will consist of a total communications assessment, as well as, measuring companies Total Cost of Ownership, which will include a customized ROI analysis for your business.

The seminars will focus on improving productivity, controlling expenses, employee mobility, disaster recovery, business continuity and more importantly simplifying the management and administration of your telephone system.

The seminar will take place on December 14, with two sessions at 9:00-11:00am and 1:00-3:00pm. To learn more about attending the free seminars please contact Uplinc at <http://www.uplinc.com/seminar/seminar.html> or by calling us at 1-888-875-4621 ext. 235.

About Vantage Communications
